FAQ: Frequently Asked Questions about Tomos 4 Engines

Q1: What is the recommended fuel-oil mixture for a Tomos 4 engine?

A1: The recommended fuel-oil mixture varies depending on the specific Tomos 4 model. Always consult your owner's manual for the precise ratio. Typically, it's around 25:1 (25 parts fuel to 1 part oil), but using the incorrect ratio can severely damage your engine.

Q2: How often should I change the oil in my Tomos 4 engine?

A2: The frequency of oil changes depends on usage. For frequent use, consider changing the oil every 500-1000 miles or every 3 months. Less frequent use might allow for longer

intervals, but it's always safer to err on the side of caution.

Q3: My Tomos 4 engine is smoking excessively. What could be the cause?

A3: Excessive smoke usually points to an issue with the fuel-oil mixture (too much oil) or a problem within the engine itself (e.g., worn piston rings, damaged seals). Check the fuel-oil ratio first, and if the problem persists, seek professional help.

Q4: How do I adjust the carburetor on my Tomos 4 engine?

A4: Carburetor adjustment is a complex process and should only be attempted if you have experience working with small engines. Incorrect adjustment can severely affect engine performance and fuel efficiency. If you're unsure, consult a qualified mechanic.

Q5: Where can I find replacement parts for my Tomos 4 engine?

A5: Many online retailers and specialized moped shops carry replacement parts for Tomos engines. You can also find used parts through online forums and communities dedicated to Tomos mopeds.

Q6: What are the signs of a worn-out piston in my Tomos 4 engine?

A6: Signs of a worn piston include reduced engine power, excessive smoke, increased oil consumption, and a knocking sound from the engine. If you suspect a worn piston, it's crucial to have the engine inspected by a mechanic.

Q7: Can I use synthetic oil in my Tomos 4 engine?

A7: While some owners successfully use synthetic oil blends, it's essential to check your owner's manual. Using the wrong type of oil can damage your engine. Always stick to the manufacturer's recommendations.

Q8: My Tomos 4 won't start. What are the first things I should check?

A8: First, check the fuel supply (is the tank full and the fuel line clear?), then inspect the spark plug (is it clean and properly gapped?), and finally, examine the air filter (is it clogged?). If these checks don't solve the problem, investigate further or seek assistance from a mechanic.
